EWS Reporting

If you do not have stats access, please email statsaccessrequest@yahoo-inc.com. You will have to enter a business reason for access and your information will be routed to the approver.

EWS Usage Report

https://stats.ysm.yahoo.com:9999/MyNA/Advertiser/customer_operations/ews_usage.job

Within STATS, the EWS Usage Report can also be found under the following navigation path: Jobs -> MyNA -> Advertiser -> Customer Operations -> EWS API Usage

How to use it?

- Please provide a job label, specify a date range, upload an optional text file, check breakout options, select optional international markets, and confirm. Then click on "Run job". The usage report will be sent to you via email when the job is done.
- Audit database has 100 million records per day. It takes some time to run the job. Please be patient.
- SAGE data is available from 9/29/2006 to 2 days before today. However, some licensees may not have activity in this full date range.
- International markets are optional. You can select multiple international markets. The international market selector does not include the US market. Ignore the market selector at the upper right hand corner.
- In the usage report, "count" column means number of operations, "over quota" means number of exceeded quota operations. For example, if a user calls addKeywords for 100 keywords, the count (quota used) is 100.

Upload File	International Markets	Output
A text file of license keys / YSM account ids / company ids / spend account ids	none	Usage report for uploaded keys/ids in all markets including the US
A text file of license keys / YSM account ids / company ids / spend account ids		Usage report for uploaded keys/ids in selected international markets
No Upload File		If "No Upload File" is selected, you have to select at least one international market
No Upload File		Usage report for the entire selected international markets

Enhancements released to production on 11/16/07

- Add EWS version breakout option
- Add Master Account and Company Id breakout options
- Add CRM Account Name and License Name to output
- Change date format from 20070801 to 2007/08/01
- Add text box to input a few license keys or account ids
